Company Development Timeline

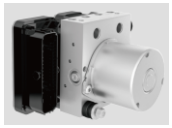

NBS

(电控制动助力系统)

ESC

(电子稳定控制系统)

NBC

(集成式智能制动系统)

EPS

(双小齿轮线控转向系统)

EMB

(电子机械控制系统)

2016

Establishment

Headquarters: Hangzhou

2018

NBS (NBooster) mass production launched

First in China to apply brake-by-wire for L4 commercial operation

2019

Start R&D of ESC

2020

Capacity expansion

Hangzhou Xiaoshan plant completed, and SOP launched

Mass delivery of ESC commenced.

2023

Launched NBC solution

(advanced One-box solution)

2024

Mass production of NBC and redundant ESC launched.

2025

Jiaxing Haiyan plant put into SOP

Established Robotics Division

Launched independent R&D on EPS (steer-by-wire) technologies

2026

prospectus to HKEX on 2026 Apr 29

Major shareholders: CATL, Hillhouse Capital, SDIC CMC Investment, etc.

(Valuation: approx. RMB 4.05 billion)

EMB SOP by the end of 2026

Comments

- **Sales**: Revenue grew from 272 million in 2023 to 615 million in 2025, driven by strong demand for new products like NBC.
- **Gross Margin**: Gross margin improved significantly from 1.1% in 2023 to 13.6% in 2025, reflecting better economies of scale and product mix.
- **R&D**: R&D spending remained focused on core steer-by-wire technologies, with a slight decrease in investment over the three-year period.
- **SG&A**: SG&A expenses increased as the company expanded its business, putting pressure on overall operating costs
- **Debt to Assets**: In 2025, the company maintained a high debt-to-asset ratio due to liability pressure from the valuation adjustment mechanism (VAM) agreement.

Plan to hire 35 additional marketing & sales staff for overseas markets.

Exploring New Markets and Application Scenarios. Our market expansion strategy encompasses both geographic diversification and application scenario development. Internationally, we plan to establish partnerships with global OEMs to access overseas automotive markets. We are also exploring opportunities in emerging markets where automotive intelligence is gaining momentum, such as Southeast Asia. Our marketing initiatives focus on strengthening partnership with domestic OEMs as they sell their vehicles overseas. Simultaneously, we are accelerating direct sales to overseas by actively engaging in international bidding. For example, we collaborated with a customer in Malaysia, and the product under this collaboration has achieved mass production and generated revenue. We will continue to pursue technical collaborations with overseas customers. We are targeting overseas OEM markets by collaborating with global vehicle design companies. We started to generate revenue from sales in the overseas market in the second half of 2024, and we recorded revenue of RMB0.3 million in 2024 and RMB11.2 million in 2025, demonstrating our growth potential in the emerging markets. Beyond traditional passenger vehicles, we are developing solutions for new application scenarios, such as humanoid robots and low-altitude aircraft. We also plan to set up overseas subsidiaries to facilitate international business development, market expansion and international supply chain management, and to serve as a hub for global R&D and talent acquisition. Further, to demonstrate the value proposition of our X-by-wire technology, we are scheduled to participate in international automotive exhibitions, technical seminars organized by OEMs and industry associations and collaborative development programs with OEMs. To strengthen these marketing initiatives, we plan to recruit approximately 35 marketing personnel.
